## Wall Display Products

### Gallery Print

A photographic print is bonded onto 10mm foamex board and laminated for protection. Wooden batons are fixed to the back, giving the effect that it is floating just off the wall.

### Canvas Wrap

The image is printed onto fine art canvas using UV stable ink and is then wrapped around 42mm bars. The finished product is then laminated for protection.

## Wall Display Products

### Acrylic Frame

A photographic print is sandwiched between two 5mm acrylic panels. Acrylic Frames are available with a frosted (as shown), black or white back panel.

### Box Frame

A photographic print sits level with top of frame and is laminated for protection. The Box frame, which is 50mm deep, is available in 9 different colours, white (as shown), black, beech, wenge, oak, gold, silver, bronze and gunmetal.
